

St. Augustine School Enjoys May 2019

May was an exciting time for St. Augustine school. As we reflected on the year of our 10th Anniversary of being a Catholic School, the staff and students took pride in spreading the Word of God in the streets of Wilcox during World Catholic Education Day. After our daily assemblies and documenting on a large poster of how they will be Joyful Disciples, we gave the students the task of going out into the community of Wilcox to search for the face of God.

This was done as a video scavenger hunt, so the students were able to capture and record their discoveries. In addition to finding many images of God in our community, the students were to document living examples of the Fruits of the Holy Spirit.

To conclude this video scavenger hunt, the students posed the question, “Why is Catholic Education important in our community?” The results were tremendously positive and the students had so much fun taking time to observe all of God’s greatness around us!
